this book contains research papers that were accepted for presentation at the 17th

international conference on interdisciplinarity in engineering inter eng 2023 which was held on 5 6 october 2023 in the city of târgu mureş romania the general scope of the conference towards transition for a more competitive european industry in a smart safe and sustainable future is proposing a new approach related to the development of a new generation of smart factories grounded on the manufacturing and assembly process digitalization it is related to advance manufacturing technology lean manufacturing sustainable manufacturing additive manufacturing manufacturing tools and equipment it is a leading international professional and scientific forum of great interest for engineers and scientists who can read in this book research works contributions and recent developments as well as current practices in advanced fields of engineering

this book is volume 1 of the proceedings of 2023 sustainable education and development research conference this volume concentrates on papers in the area of clean energy despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2 4 billion people continue to use harmful and polluting fuels for cooking while efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve sustainable development goal 7 adding to the challenge the ongoing war in ukraine has contributed to rising global energy prices and heightened energy insecurity in europe in response to the energy crisis some european countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency however others are considering a resurgence of coal which poses a risk to the overall green transition between 2010 and 2020 the percentage of the global population with access to electricity increased from 83 to 91 with 1 3 billion people gaining access nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub saharan africa achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0 5 percentage points to 0 9 percentage points necessitating significant efforts in low income fragile and conflict affected countries in 2020 69 of the global population had access to clean cooking fuels and technologies while more than half of those without access to clean cooking fuels live in asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in africa the share of renewable sources in total

final energy consumption reached 17.7 globally in 2019 just slightly higher than the figure for 2015 the electricity sector leads in the adoption of renewables accounting for 26.2 of total final energy consumption in 2019 while the heat and transport sectors have made limited progress global primary energy intensity defined as global total energy supply per unit of gdp improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 however the rate of improvement 1.6 per year on average since 2015 falls short of the 3.2 annual rate needed to reach sustainable development goal 7.3 international financial flows to support clean and renewable energy in developing countries reached 10.9 billion in 2019 a 23.6 decrease from 2018 this decline occurred even before the onset of the covid 19 pandemic over a longer five year moving average average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2019 although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020 small island developing states least developed countries and landlocked developing countries have lagged behind it would take least developed countries and landlocked developing countries nearly 40 years and small island developing states almost 15 years to reach the same level of progress as the average developing country in 2020 the 2023 sedrc conference titled sustainable development and education aims to redefine the understanding of research in the continent's development and the role of researchers the conference focusses on applied research discussions and its dissemination researchers from research institutions academicians postgraduate students politicians and industry representatives will be the primary audience for the conference proceedings

non exhaust emissions an urban air quality problem for public health comprehensively summarizes the most recent research in the field also giving guidance on research gaps and future needs to evaluate the health impact and possible remediation of non exhaust particle emissions with contributions from some of the major experts and stakeholders in air quality this book comprehensively defines the state of the art of current knowledge gaps and future needs for a better understanding of particulate matter pm emissions from non exhaust sources of road traffic to improve public health pm is a heterogeneous mix of chemical elements and sources with road traffic being the major source in large cities a significant part of these emissions come from non exhaust

processes such as brake tire road wear and road dust resuspension while motor exhaust emissions have been successfully reduced by means of regulation non exhaust emissions are currently uncontrolled and their importance is destined to increase and become the dominant urban source of particle matter by 2020 nevertheless current knowledge on the non exhaust emissions is still limited this is an essential book to researchers and advanced students from a broad range of disciplines such as public health toxicology atmospheric sciences environmental sciences atmospheric chemistry and physics geochemistry epidemiology built environment road and vehicle engineering and city planning in addition european and local authorities responsible for air quality and those in the industrial sectors related to vehicle and brake manufacturing and technological remediation measures will also find the book valuable acts as the first book to explore the health impacts of non exhaust emissions authored by experts from several sectors including academia industry and policy gathers the relevant body of literature and information defining the current knowledge gaps and future needs

this book delves into the cutting edge field of electronic materials focusing on their pivotal role in shaping a sustainable and technologically advanced future this comprehensive book brings together a selection of contributions that explore the transformative impact of electronic materials on various industries including health care aerospace energy and electronics the book places a spotlight on the forefront of technological innovation with a particular emphasis on nanoelectronics readers will navigate through the technological landscape of electronic materials uncovering its significance in driving sustainable technologies that address the emerging challenges and also explore the emergent properties of electronic materials such as multifunctionality reliability and scalability through in depth analysis and case studies this book showcases how these properties propel researchers in electronic material science toward ground breaking solutions with real world applications this book serves as a collaborative and descriptive platform fostering interdisciplinary discussions and knowledge exchange it acts as a bridge between various fields providing a space for researchers scientists and engineers to share cutting edge discoveries and advancements the book is more than a collection of articles it is a forward looking exploration of the dynamic nature of material science and technology it highlights how researchers and engineers are pushing the boundaries leveraging the remarkable

properties of materials to create solutions that enhance efficiency innovation and sustainability

automotive technicians must learn how to safely and effectively maintain diagnose and repair every system on the automobile fundamentals of automotive technology provides students with the critical knowledge and essential skills to master these tasks successfully with a focus on clarity and accuracy the second edition offers students and instructors a single source of unparalleled coverage for every task from mlr through mast fully updated and reorganized the revised format enhances student comprehension and encourages critical thinking
